INSENSIBLE PERSPIRATION.

THE above figure is given to represent the INSENSIBLE PERSPIRATION It is the great EVACUATION for the impurities of the body It will be noticed that a thick cloudy mist issues from all points of the surface which indicates the wonderful process going forward within This perspiration flows uninterruptedly when we are in health, but ceases when we are sick. It should be the care of every one to see that it is not checked Life cannot be sustained without it It is thrown off from the blood and other juices of the body, and disposes by this means of nearly all the impurities within us The blood, by this means only, works as it pure The language of Scripture, is "in the BLOOD is life" If it ever becomes impure, it may be traced *directly* to the stoppage of the INSENSIBLE PERSPIRATION It *never* requires any internal medicines to cleanse it, as it ALWAYS purifies itself by its own heat and action, and throws off all the offending humor through the INSENSIBLE PERSPIRATION Thus we see, all that is necessary when the blood is stagnant, or infected, is to open the pores and it relieves *itself* from all impurity *instantly*. Its own heat and vitality are sufficient without one *particle* of medicine except to open the pores upon the surface Thus we see the folly of taking so much internal remedies All practitioners, however, direct their efforts to restore the Insensible Perspiration but it seems to be not always the proper one — The Thomsonian for instance *steams*, the Hydropathic shrouds us in wet blankets the Homeopathist deals out infinitesimals the Allopathist bleeds and doses us with mercury and the blustering Quack gorges us with pills pills pills

But one object only is in view viz—to RESTORE the INSENSIBLE PERSPIRATION If this can be done they say, we will take care of the rest It will be seen, therefore that all physicians understand *alike* what is necessary for a recovery, however much they may differ as to the mode of obtaining it

To give some idea of the amount and consequently the importance of the INSENSIBLE PERSPIRATION, we will state that the learned Dr Lewenhoeck and the great Boerhaave ascertained that five-eights of all we receive into the stomach, passed off by this means In other words, if we eat and drink eight pounds per day we evacuate five pounds of it by the Insensible Perspiration

This is none other than the used up particles of the blood and other juices giving place to the new and fresh ones by carrying with it all the impurities within up to the surface To check this, therefore is to retain in the system five-eights of all the virulent matter that nature demands should leave the body And even when this is the case, the blood is so active a principle, that it determines these particles to the skin, where they form scabs, pimples ulcers, and other spots, but if it is directed inwards, and falls upon the lungs, the consequences are generally fatal

By a sudden transition from heat to cold, the pores are stopped the perspiration ceases, and disease begins at once to develope itself Hence a stoppage of this flow of the juices, originates so many complaints It is through the surface that we imbibe nearly all our ills

It is by stopping the pores that overwhelms mankind with coughs colds and consumption Nine tenths of the world die from diseases produced by a stoppage of the INSENSIBLE PERSPIRATION

It is easily seen therefore, how NECESSARY is the flow of this subtle humor to the surface, to preserve health It cannot be stopped, it cannot be even checked, without inducing disease The blood and intestines must relieve themselves of all their worn out particles, and poisonous humors and they must go through the pores as nature designed

Let me ask now, every candid mind, what course seems the most reasonable to pursue, to unstop the pores after they are closed, and let the perspiration flow, that the blood may relieve itself of its impurities? Would you give physic to UNSTOP the pores? Or would you apply something that would do this upon the surface, where the clogging actually is? Would not this be common sense And yet I know of no physician who makes any external application to effect it The reason I assign is, that no medicine within their knowledge is capable of doing it. Under these circumstances I present to physicians, and to all others, a preparation that has this power in its fullest extent It is *McAllister's All-Healing Ointment* or the *World's Salve* It has POWER to restore perspiration on the feet, on the head, around old sores upon the chest, in short upon any part of the body, whether diseased slightly or severely When the perspiration is restored, it has POWER to penetrate to the lungs liver or any other part of the human system, and so act upon them if they be diseased, by separating the inflamed morbid particles therefrom, and expelling them to the surface

It has POWER to cause all *external* sores, scrofulous humors, skin diseases, poisonous wounds, to discharge their putrid matter, and then heals them

It is a REMEDY that sweeps off the whole catalogue of cutaneous disorders, and restores the tenture cuticle to its healthy functions

It is a REMEDY that forbids the necessity of so many and deleterious drugs taken into the stomach

It is a REMEDY that neither sickens, gives inconvenience or is dangerous to the intestines.

This REMEDY is probably the only one known, that is capable of producing all these great results. Its great value is in restoring at once, the circulation of the juices when checked or disarranged by cold or other causes It preserves and defends the surface from all derangement of functions, while it keeps open the channel for the blood to void all its impurities and dispose of all its useless particles — There is a connection, harmony, and feasibility, in it all that offers no contradiction. It is a simple but wonderful principle that preserves in healthy operation the entire machinery of our being — It, in fact, absolutely holds together the *surface* and *internal Viscera*, the *internal Viscera* and the *surface* They are inseparably connected and cannot be disjoined. The surface is THE outlet of the excrements of the bile and used up matter within It is pierced with MILLIONS of openings to RELIEVE the intestines Stop up these pores and DEATH knocks at your door. It is rightly termed All-Healing, for there is scarcely a disease, external or internal, that it will not benefit. It will be found the most useful as well as the cheapest family medicine in the world I have used it for the last fourteen years with success without a parallel. I have used it for all diseases of the chest, consumption, liver, and the most dangerous of internal maladies I have used it in cases of extreme peril and hazard, involving the utmost danger and responsibility and I declare before heaven and man that not in one single case has it failed to benefit when the patient was within the reach of mortal means

I never, to my recollection, had more than five or six among the thousands who have used it, say that it was not favorable to their complaint On the contrary I have had hundreds voluntarily, and in the warmest and most pathetic language speak in its praise I have had physicians learned in the profession, I have had ministers of the gospel Judges on the Bench, Aldermen and Lawyers, gentlemen of the highest erudition and MULTITUDES of the POOR, use it in every variety of way, and there has been but one voice one united, universal voice saying "McAlister, your Ointment is GOOD

CONSUMPTION

Of all diseases, we find this the most important, and concerning which we meet with the most opposition It can hardly be credited that a salve can have any effect upon the lungs, seated as they are within the system But we say once for all, that this Ointment will reach the lungs *quicker* than any medicine that can be given internally Every body consents to the fact, that if a healing medicine could be applied ON the lungs, there would be great hopes of recovery The difficulty is to get the medicine *there* Now the Salve has the wonderful virtue of extracting the putrid diseased humors from all *external sores*, by causing the matter to discharge In like manner it operates upon *internal* affections by driving all the impurities through the pores to the surface Thus with Consumption it placed upon the chest it penetrates directly to the lungs separates the poisonous particles that are consuming them and expels them from the system

It is the simplest and most rational process in creation if one has *the medicine* capable of doing it The All-Healing Ointment possesses this power to the fullest extent I need not say that its curing persons of consumption continually, although we are told it is foolishness I care not what is said, so long as I can cure several thousand persons yearly If this medicine was in the hands of some pretend medicine brawlers they would make an uproar through the country that would be insupportable

SCROFULA, OR KING'S EVIL

This disease is really inveterate, and hard to be subdued It is generally seated in the side of the neck, behind the ears and under the chin yet rarely any part of the body is exempt It sometimes feeds on the lungs, and produces consumption It is a dreadful circumstance, that it is disease is transmitted from parents to children

The Salve will extract all the morbid matter by causing the sores to discharge and then let the *Solar Tincture* be used to drive it to one point which does a continuance of the Ointment will completely remove the disorder — This is probably the safest and most effectual of any method It should be adopted without a moment's hesitation

ERYSIPELAS

This complaint arises from impurities being driven out to the surface by means of the INSENSIBLE PERSPIRATION and lodging in the cuticle raises some pimples, &c.; being of a acrid and putrifying nature It only requires that it should discharge its virulent particles through the skin, and the difficulty will pass off If suffered to remain, and driven inward it is frequently fatal

Let the Salve *and Solar Tincture* be used as in Scrofula, and the patient will soon get well

SALT RHEUM

This is another obstinate disease but can be cured effectually as the Scrofula There is no difficulty in this disease

HEAD ACHE EAR ACHE AND DEAFNESS

The salve has cured persons of the Head Ache of 12 years standing and who had it *regularly* every week so that vomiting often took place It cured the wife of a man who laughed in my face for proposing such a cure and who now would not be without it for the best farm in the state If any man will take the trouble to call I will give his name

Deafness and Ear Ache are helped with like success, as also Ague in the face

COLD FEET

Consumption, Liver Complaint, pains in the chest or side falling of the hair, one or the other always accompanies cold feet It is a sure sign of disease in the system to have cold feet Some persons are totally unable to get them warm and endure much suffering thereby The Salve will rest in the INSENSIBLE PERSPIRATION and thus cure every case It is invaluable for this

ASTHMA, TIGHTNESS OF BREATH

If this disease be not hereditary and produced by a mal formation of the chest the Salve will cure it.

DYSPEPSIA

One would suppose a Salve would not effect this disease much, but the All-Healing Ointment will cure two, sooner than internal remedy will cure one.

SORE EYES

The inflamation and disease always be back of the ball of the eye in the socket Hence the inutility of all remedies that are used upon the lids The virtue of any medicine must reach the seat of the inflammation or it will do little good This Salve if rubbed on the temples will penetrate directly into the socket and infuse all its virtues upon the disorder The pores will be opened a proper perspiration will be created and the disease will soon pass off to the surface How easy and how natural! It is as perfect and valuable as it is simple and philosophical

SORE LIPS, CHAPPED HANDS, ETC

I sell a great deal of Salve to Seamen, who say it is the ONLY thing they can depend on to cure their raw hands when exposed to the weather at sea It acts like a charm in these complaints. Two or three applications cure

PIMPLES ON THE FACE, FRECKLES, TAN, MASCULINE SKIN, GROSS SURFACE.

Its first action is to expel all humor It will not cease drawing till the face is free from any matter that may be lodged under the skin and frequently breaking out to the surface. It then heals. When there is nothing but greasiness, or dull sepulcheral surface, it begins to act till the skin becomes as smooth and delicate as a child's. It throws a freshness and blushing color upon the now white, transparent skin that is perfectly enchanting Sometimes in case of Freckles it will first start out those that have lain hidden and seen but seldom Pursue the salve and all will soon disappear The reason for this wonderful change in a lady's face is that it excites into natural and healthy activity the Insensible Perspiration, while it renovates and renews the surface, which leaves the skin in as lively and delicate a condition as the most fastidious could desire. It is put up in fine jars and beautifully scented on purpose for the toilet.

BURNS

Life can always be saved if the vitals are not injured I have so many testimonials for the cure of this complaint that I could fill a book I suppose there is not a family in the U States, that would consent to be without this Salve a single day, if they know its value in healing burns alone It extracts the pain and leaves the place without a scar

QUINSY SORE THROAT, INFLUENZA, BRONCHITIS

There is not an internal remedy in existence, that will cure these disorders as quick as this Salve. It opens the pores on the neck and draws off all the inflammation and impure juices, and a few days sees the patient well It is sovereign in these cases.

PILES

The Salve acts upon the Piles as upon Sore Eyes — There is an inflamation, which must be drawn from the parts. The Salve does this

HERNIA OR RUPTURE

The Salve has cured some very bad cases of rupture, and although it might not all, yet it would be wise to try it It is a peculiar complaint, but it may be helped some, if not cured entirely I have not the shadow of doubt that it would cure thousands if a trial was made, who believe no medicine of the least benefit.

Its worth would satisfy any one, whether it would do good or not.

WORMS.

If parents knew how vital most medicines were to children, taken inwardly, they would be slow to resort to them. Especially 'mercurial lozenges,' called 'medicated lozenges,' 'vermifuges,' pills, &c. Even were it possible to say positively that worms were present it is not safe. The truth is, no one can tell, invariably when worms are present. Of course the remedy is not applicable in the complaint. Now let me say to parents, that this Salve will always tell if a child has worms. Let it be rubbed on the neck and chest, to keep them from going up, and then down on the bowels, and they will soon leave It will DRIVE every vertige of them away. This is a simple and SAFE cure. No injury can come of it any way. But should it be cholic, inflammation of the bowels or gripe of the intestines, it will effectually cure them as the worms

There is probably no medicine on the face of the earth at once so sure and so safe in the expulsion of worms It would be cruel, any WICKED, to give inferior doubtful medicines, so long as a harmless, certain and effectual external one could be had

CHOLIC, PAIN, OR INFLAMMATION OF THE BOWELS

Let the Salve be rubbed in and heated with the fire or hot flat irons, and all pain and difficulty will soon cease

SWELLINGS

of the Joints, or weakness, or any affection of the bone, nothing is so good as this Salve.

POISONS

I never know any thing so good as this Salve It causes the poison to discharge immediately, and leaves not the slightest cause of alarm Poison by nails, bites of animals, or burns, it removes when nothing else will

BOILS

I have it done up in fine order for the dressing case Although I have said little about it as a hair restorative, yet I will stake it against the World They may bring their Oils far and near, and who will restore the hair two cases to their one Those are no idle words, for I am ready to back it with any reasonable amount.

OLD SORES MORTIFICATIONS, ULCERS, ETC

There is no effectual way of curing these but by drawing off the putrid matter To merely dry it up would only endanger one's health more The sores Sores are an outlet to the impurities of the system is the only reason, because they cannot pass off through the natural channels of the bowels or perspiration If such Sores are healed up, the impurities must have some other outlet or it will endanger life This is the reason why it is impolitic to use the common Salve of the day in such cases For they have no power to open other avenues to let off this morbid matter, and the consequences are always fatal This Salve will always provide for such emergencies There need be no fear It is perfect

BROKEN BREAST

Persons need never have a Broken Breast The Salve will ALWAYS prevent it, if used in season.

LIVER COMPLAINT

Persons with this disease frequently have eruptions of the hands, face and other parts and never once think that it arises from the liver Their other inability to move these eruptions, proves the misapprehension of the disorder Such must use at first the Salve, then work it on the chest, and the difficulty will soon go away

FILLAL PASSION OR GRIPING OF THE INTESTINES

This disease cause the death of the late accomplished Hughes Legare Attorney General and acting Secretary of State of the United States It is the stopping up of the cuticle of intestines, in consequence the swelling of them It is brought on by a neglect of the bowels, or from concentrated Bemia The pains are awful and unless help comes speedily the sufferer wounds

The All-healing Ointment would have saved the life of Mr Legare and all others in the similar circumstances

All pains, gripings inflammations and disorders of the bowels will be relieved if not effectually cured

CORNS

If the Salve is used according to directions people need never be troubled with Corns especially, cut to pieces with Mutchins which makes doing more harm than good The composition is A little of this ointment put on now and then will always keep them down

Bad sores are few simple instances will not benefit It is EQUALLY well for all mild or fine Aches in the sky rolls over the old and green grass upon the earth It will be seen that I use no idle words, but I am ready to back it with any reasonable amount of testimony after testimony to the effect of this Salve

I attribute the healthful change entirely to the use of this great medicine Feeling a deep sympathy with those who are afflicted with this most tormenting and painful complaint, I do not refrain from recommending to others the use of this valuable specific. Having the most entire confidence in the medicine and skill of Dr Sands, I was induced thereby to try the effects of their Sarsaparilla and I take pleasure in adding my testimony to that of many others commendatory of its invaluable properties as known to and unsolicited by the Messrs Sands CHARLES DYER Jr

TRIUMPHANT SUCCESS OF

BUCHAN'S HUNGARIAN BALSAM

THE GREAT ENGLISH REMEDY FOR

CONSUMPTION!

THIS great and only REMEDY for Colds Coughs, Asthma, and CONSUMPTION is the *HUNGARIAN BALSAM OF LIFE*, discovered by the celebrated Dr Buchan of London England, and introduced into the United States under the immediate superintendence of the Inventor

The extraordinary success of this Medicine in the cure of Pulmonary diseases, warrants the American Agent in soliciting for treatment the WORST POSSIBLE CASES that can be found in the community—cases that seek relief in vain from many of the common remedies of the day and have been given up by the most distinguished Physicians as CONFIRMED AND INCURABLE The Hungarian Balsam has cured and will cure, the *most desperate cases* It is no quack nostrum, but a standard English Medicine of known and established efficacy

INCONTESTIBLE PROOFS,

Of the efficacy of this Balsam in the worst forms of Consumption.

From Dr Storer of Saco, Me

DR BUCHAN Dear Sir The Hungarian Balsam has in all instances a most perfect and I may add a miraculous operation for Diseases of the Lungs I have used it in my family and in my profession I prescribe it in more than two cases, with the most unfailing success in cases of severe Pulmonary Disease and I feel constrained to recommend it to all who are afflicted as the most certain remedy for such diseases with which I am acquainted

Yours Respectfully,
FREDERICK T STORER, M D

Saco, May 22, 1845

Another Life Saved.

BATH Me Feb 24 1845

DR BUCHAN Dear Sir I take much pleasure in giving you a statement of the beneficial effects of the Hungarian Balsam on my daughter who I had long been in the last stage of Consumption and in the last stage of the disease, and trouble which attend this insidious disease, Our situation in Bath I employ the physic in who attended her a long time at great expense, and then drained the dissolution for celebrated physicians in neighboring towns at still greater expense and after a number of visits from the advising physicians and the continual care of the family physician he declared she could do no more for her. He had done all that he could and I could see no benefit from it. I then applied a Hungarian Physician for some time who had very to do her some good, but did not reach the root of the disease I was then advised by a friend to try Buchan's Hungarian Balsam I have used six bottles with the most astonishing effect. It has restored her strength cured her entire of her cough and pain in the side and she is now attending to her accustomed duties This may seem wonderful but it is no more strange than true, and I would advise all who have symptoms of consumption to take this medicine in season and not wait till all hope is past, although this case has terminated so fortunately. In this case I paid between one and two hundred dollars for physicians and medicine without any satisfactory benefit while six dollars worth of the HUNGARIAN BALSAM has removed the disease renewed the strength and brought on a healthy action of the system Try it for yourselves and you will be the one half has not been told You can use this as you think best and as will do most good wishing that your medicine may benefit many as much as my daughter,

I remain gratefully yours, JNO YOUNG

P S I would say further that about five years ago my daughter commenced raising blood which continued at times for three years and sometimes very bad, for about two years when she commenced taking this Balsam The first bottle stopped the raising of blood entirely and she has never been troubled with it since

From J E Ladd, Apothecary, Augusta

AUGUSTA, Me May 27 1845

DR BRADLEE—Dear Sir Having sold the Hungarian Balsam of Life for two years past and having personally observed its beneficial effects in many cases of long complaints and some of them very severe, I do not hesitate to recommend it as an excellent preparation for those diseases for which it is recommended

Very respectfully, &c J E LADD

GREAT CURE AT AUGUSTA ME

AUGUSTA, May 27 1845

DR BRADLEE Dear Sir I can truly say that the Hungarian Balsam has been of the most infinite service to me I have been cured of an affection of the lungs which was thought to be INCURABLE by all my friends, by the use of a few bottles One of my children was also restored to health after being pronounced beyond the reach of medical aid by the physicians of it is now my constant resort in case of any difficulty in the throat and lungs I have recommended the Balsam to a great many persons and shall continue to do so as I believe it to be the best thing in the world for diseases of the lungs

Yours, truly, FRANCIS J WEEKS.

From Edward Mason Druggist Portland, Me

PORTLAND, Me April 17, 1845

DR BRADLEE Dear Sir The Hungarian Balsam gives good satisfaction in this city and vicinity, and I see no doubt from the reports I hear of its salutary effects upon invalids that it is an excellent preparation for the disease of the lungs EDWARD MASON,

Apothecary, 52 Middle street

HEAR THE PRESS.

From the Christian Observer, March 2 1845

The public may place the utmost reliance upon the statements respecting the Hungarian Balsam, by the Bradlee the American Agent, who is an old and highly respectable citizen of Boston, a member of a christian church and a man who would not for any consideration give his influence in favor of any sort of deception or imposture

From the Thomsonian

If any thing could recommend us to a departure from Thomsonian principles, in the treatment of disease it would be the extraordinary reputation of a medicine like the Hungarian Balsam, which we believe both safe and efficacious in cases of severe Pulmonary Disease and we consequently recommend it to all who are afflicted as the most certain remedy for such diseases with which I am acquainted

Yours Respectfully,
FREDERICK T STORER, M D

BUNKER HILL
Grand National Exhibition
AT THE
THEATRE BUILDING
BARTHOLOMEW & CO.
RESPECTFULLY inform the citizens of Bangor that their Grand Historical Panorama the
BATTLE OF BUNKER HILL
AND
NEW NATION OF CHARLESTOWN
is open every EVENING (Saturdays excepted) and will continue for a limited time.
The Building has been fitted up in a style suitable for the purpose to insure the public a good view. The Figures are very different from those in other exhibition extant, being carved in perfect symmetry, dressed in their respective costume, and are made to imitate with wonderful accuracy the movements of animated nature.
THE STORM,
OR THE VICISSITUDES OF RURAL LIFE,
preceded the Battle of Bunker Hill, and the Exhibition closes with a scene of unrivalled splendor, called the
FAIRY LAND.
☞ Particulars given in small bills.
. Admittance 25 cts, Children under 12 years of age half price. Doors open at 7½ o'clock, to commence at 8 o'clock.
July 7

CITY OF BANGOR.
In Board of Aldermen,
June 30 1845

Ordered,—That the Street Engineers be directed to proceed and lay out a South Street from Summer to Front-street as the best accommodate the public and conforming as near as may be to the open grounds now travelled and report their doings to the Council.

In Board of Aldermen
June 30 1845.
Read and passed. Sent down for concurrence.
JOSEPH BRYANT, Mayor

In Common Council,
June 30 1845
Read and passed in concurrence.

CITY OF BANGOR.
An Ordinance in relation to the leasing and management of the Real Estate belonging to the City of Bangor.
Ordained by the Mayor, Aldermen and Common Council of the city of Bangor in City Council assembled—That all the rentable real estate belonging to said city be and hereby is placed under the care and control of the City Treasurer, who is hereby directed to lease and manage the same as may seem most for the interest of the city, and report to the city council an account of the management of said property accompanying his account as City Treasurer, and that any ordinance inconsistent herewith be and hereby is repealed.
Passed July 7, 1845
A true copy—Attest.
GEO W SNOW City Clerk

CITY OF BANGOR,
In Common Council,
June 30, 1845,
Ordered That the Street Engineers proceed to lay out according to law, a road, in continuation of the road leading from the Avenue near Elias Blake's to the Levant road as follows, beginning at the point where said road intersects with the Levant road, thence nearly as the present stream runs in a direct line to a point in the road leading by the Hatch's Mills so called a little north of the house of Mr Jackson, northerly and street wards or not the direction as the engineers may find most advisable to and intersect the road on Broadway, or the Mills road to Essex street, that said road be 3 rods wide in width the whole length of the same, and that they report as soon as may be to the Council.
Read and passed. Sent down for concurrence.

Patent Water Wheel.
THE undersigned, Agents for the manufacture and sale of "VALENTINES PATENT WATER WHEELS" are prepared with *patterns* for casting all the different sizes and forms of wheels required for the various conditions in which the are used.
The superiority of these Wheels may now be considered satisfactorily established, the evidence of which may be seen in the fact that hundreds of them have been put into successful operation in this State within two years past and also in the fact that a diploma was awarded for them by the managers of the Mechanic's Fair in Boston last year, and further that many careful experiments were made by scientific Engineers at Lowell last season the results of which as stated in a communication by one of them, prove conclusively that the Valentine Wheel is at least 50 per cent stronger than any of the Tub or Reaction Wheels now in general use.
The undersigned are prepared to furnish the above Wheels, together with all other kinds of mill work and machinery used in this section of the country upon the most reasonable terms.

By Order of the State Committee

Bangor, June 1845

The Duty of Men regarding the Temperance Enterprize.

There is a weighty responsibility committed to the hands of the present generation of active men The destiny of millions of people rests upon them The liberty, social condition, progress and happiness of the great mass of millions of people are depending upon them to a period which no human calculations can fathom — There is too much serious work then for all earnest minds, to allow of their stopping by the way to quarrel about minor matters, or to gratify personal pques, or to cherish the tartarian spirit of envy and malice He who wishes well to the whole race must show the heartiness of those wishes by the exercise of a kindly spirit to each, and if he would exert the best influence he must bring order into his own heart by turning out the demons that he concealed there and which disturb the quiet action of his powers What is best for all men is the highest good of each man, and in the progressive energies of human nature to a higher state of culture, purity, refinement and power, we are all bound not merely to leave the world as well as we found it, but to contribute to its advancement and elevation If we do not this we live in vain We gather in of the knowledge and experience of those who have gone before us, but contribute nothing to those who are to follow

A slight survey of the condition of human society reveals to us the fact that there are thousands of men who are sleeping all their God given powers in the intoxicating cup Thousands, for the lust of gain, become ministers in this monstrous work of destruction They have before them a picture of the downward course of the pernicious stream whose issues they unstrip, and they daily witness the gradual and death dealing blight which it spreads over their victims, until propetty, health, mind and heart are ulcerated, and the holiest ties of life are broken, and the most sacred duties ruthlessly trampled beneath their feet in strange forgetfulness and even scorn

To arrest this destructive tide and to bring back the wanderers and restore those who have been swept away from duty and manhood, is the work imperatively laid upon all men capable of seeing the evil And what heart can fail to be touched in behalf of the cause of temperance when its wide spread and deep reaching causes are examined? What man but feels that there is no better place in which he can labor than in saving his fellow men, who by thousands are being crushed by this giant evil an evil that so hedges up the way of man s progress in every good word and work—that so blots out the image of God in the soul, and blurs all his mental vision, and strangles the affections of the heart, and roots out all love to God and love to man? Of giant strength as the evil of intemperence is, the progress that has been made in turning back is course affords the highest ground of encouragement, not for listless hope, but for continued and energetic action

The advance that temperance has made under all the old disadvantages of opposing fashion, and habit and vitiated appetite, has restored thousands to honorable stations in society It has fed the famished children of want It has clothed many suffering creatures and sheltered them from the inclemencies of the weather It has provided a home for many homeless and desolate It has supplied to many of the young the means of education and honor It has carried comfort to hearts of woe It has spread over the land the sunlight of joy—opened wide the door of hope—awakened a noble self respect—and rolled, as with an Archimedian lever, thousands and thousands of the lowly, and, if not for this temperence effort, the abandoned and lost Who can rightly estimate the importance of these facts and of the influence upon society of these thousands of men ceasing to vegetate in mere animal indulgence, awakening to newness of life as intellectual beings? Consider too that many of them are heads of families and have a direct influence in forming the intellectual habits of their families, and we cannot fail to contemplate their reformation as an event in our history whose influence must result in incalculable good, by causing a wider diffusion of useful knowledge and preparing the rising generation to take higher rank as men of intelligence and moral worth, than the preceding generation—men thoroughly furnished with intellectual implements and possessed of the bone and gristle of manhood

We have all been taught by the temperance enterprize the value of kind words and kind actions, for their introduction into its operations has secured the heaven blessed efforts of woman, faithful, energetic, unfainting and unfailing woman She has shed around this cause her vivifying influence and shown her readiness, now as ever, to wipe the feet of the world s reformers with the rich tresses of her hair and to anoint them with the precious ointment of her love and faith

Let us understand our relations to the age in which we live, Let us fathom the sublime humanity committed to our keeping. Let us attend to the glad voice of cheer now sounding over the wide and strange waters of society — And in all these we shall find there is committed to us the intellectual, moral and social interests of humanity Oppression, injustice, ignorance, and debasement are all to be removed, and removed by our efforts Reform, benevolence, equality, kindness, mercy, perseverance, these are the watchwords that must be written on our banners, and made to thrill on every ear The black and frowning walls of separation between parties, and sects, and professions, must be broken down by elevating all to the highest advantages and happiness of which the human mind is capable Then shall man walk forth to greet his brother—a world embracing love shall animate him and religion like a loving and generous mother shall clothe us with her spotless garments, and the evening of the world s existence shall be as pure and holy as its morning

To these results the temperance enterprize and all the great intellectual and moral movements of the day are constantly tending and these they will ultimately secure All these movements are but so many steps leading humanity onward through the wilderness to the promised land of greater equality, purity and happiness In this fact is presented to us the highest and sublimest motive for action—for engaging with the strongest energy in advancing the cause of temperance—of political equality—of intellectual power—of moral greatness, of religious truth, among our brethren of the human race

If we work as we may we shall find our labor prosperous—the evils that oppress men removed the joys of a higher social condition, spreading across the mountains and over the world and the blessing of Him, who alone is infinite distilling upon us like the dew of heaven

Sale of Permits to cut Timber.

Permits have been sold by the Land Agents of Maine and Massachusetts to cut timber on the following townships and sections, on the public lands on the Range mentioned, West of the East line of the State at the sums mentioned a ton for the timber

In order to secure a compliance with the conditions of the sale, a sum of about fifty dollars was paid by each purchaser and on the granting of the permit a deposit note is required varying from $200 to $1000

☞ There are a great many curious things in this world, and among the most amusing is the following demonstration that, by Morse s Telegraph, news can be carried not only without loss of time, but actually a head of it What next?

The strange fact is demonstrated to be true, that news conveyed by *Morse s Telegraph* actually travels in less than *no time* For instance, a member of Congress from Missouri commence a speech at the Capitol at 12 o clock and it is immediately communicated by Telegraph, and is announced at St Louis *at about* 11 o clock just one hour before the speaker commenced A correspondent of the U S Journal says, take any map and run your eyes due West on the degrees and you will get abundance of amusing illustrations of this *event anticipating* affair

☞ The New Yorkers find this a very good season of the year for obtaining good things to eat Their Market may thus be reported *Raspberries* 9 cts a quart *Blackberries* in prime order $3 00 a bushel, *Worthleberries* $4 00 a bushel, *Cherries* 5 cts a pound, *Tomatoes* $4 00 per bushel, *Cucumbers* $2 00 per 100 *Peas* and *Beans* 88 cts a $1,00 per bushel *New Potatoes* $1,00 a bushel, *Melons* $20,00 per 100

☞ We learn from the Piscataquis Farmer that Mr McLaughlin Innholder at East Corinth, had a small trunk taken from his bar on Saturday the 5th inst containing about $75 in money, and between $3000 and 4000 in Notes mostly payable to himself He offers a reward of $100 for the arrest of the thief—of whom he has not as yet, obtained any clue

☞ The Lowell Courier states that sixteen girls have been married from one room of the Lowell Corporation, this spring

Have the courage to do without that which you do not need Feel that your own conscience is easy, and you need not fear hard time, nor care what others say and think of you

☞ The fare between Boston and New York, is *one dollar and fifty cents* Cheap enough

☞ We are under renewed obligations to Jerome & Co s, and Gilman s Express for Boston papers received this forenoon

Support your Local Newspaper.

Let no man relinquish the newspaper published in his own neighborhood, for the sake of taking some other larger, cheaper or more popular paper published abroad The newspaper published in one s own vicinity is always, as a general rule, more valuable than any other—if it be for nothing but the advertisements, aye, the somewhat abused and much neglected advertisements, are a thermometer of the place, and often the key which opens the door to excellent bargains It is of no little consequence for the farmer to know what is going on in his market town, the competition in selling goods and the competition in buying produce—the changes in business operations—the settlements of estates—the sale of farms, stocks, &c &c— We venture to say, there is no man who may not every year much more than save the price of subscription to his neighboring newspaper, from its advertising columns alone; and on this ground exhort all to patronize their own newspapers —Exchange Paper

Fun from England.

The following items have been selected from late English papers —

A pleasant announcement appears in a Liverpool paper A packet ship from America has brought to England 2447 hides and 10 casks of shoe-pegs The war, therefore, between the two countries has begun, as the Yankees are not only pegging into us, but "leathering us"

The lawyers have had a part of Lincoln s Inn Square laid out as a garden simply because, as lawyers, they like to make the most of all that's *green*

If I were to weigh thirty stone I should be a very gross personage, but if a man who sells tea, coffee, and sugar is a—grocer

Daniel Lambert was a great man, but the instrument with which you powder nutmegs is a —grater

The lodging house keepers complain they cannot take people in

The schoolmaster complains that he can get no young ideas to learn to shoot, and that he shall so shoot himself

The fishmonger says the public have become more likes sharks than flat fish

On the recent representation of 'The Enchantress at Drury Lane there was a call for the author, whereupon Mr Bunn pulled Mr St George on the stage to receive the compliments of the audience, upon which a wag in the pit observed, that it was only a modern illustration of the story of St George and the Dragon

The repeal of the auction duties is said to be producing a sensible effect upon the trade of auctioneering We cannot well understand how this can be, unless auctioneers heads are thicker than other peoples since the knocking down system is more calculated to produce a "sensitless effect

The reason why so much difficulty exists in getting up a pictorial paper is because none of the artists are to be depended on, as they are all design ng men

It is said some members of the Peace Society are highly displeased at the quantity of powder exhibited at her Majesty s ball Those persons ought to recollect that powder is indispensable to make a ball go off with effect

Never be guilty of anything in the shape of a lie It is not palatable to society in general although the legal profession may prefer it as an action that will lie

In consequence of the numerous balls now given on behalf of the Poles the prices of hoops have considerably advanced

By the amount of rent received by Dan, one would think he was the largest land holder in the three kingdoms

Fenimore Cooper they say, is coming out with a new work it is entitled "Caoutchouc or the Indian Rubber, which is yankee Leather hose for rubber The hero is represented as an elastic waterproof character incapable of being influenced by anything less salvent than strong alcohol The Republic therefore need not fret on upon his assurance in the event of war— The book will be illustrated, and will doubtless efface from our memories every trace of all former emanations from Columbia quills Nick Wilis Pericillo, by the way, will be annihilated abraded, and completely expunged by India Rubber

RAILWAY COMMITTEE —The Chairman and Committee sat on the Equinoxial line as usual and proceeded with the engineering evidence The first witness called was a surveyor He thought there would be no difficulty in surveying from China to Peru—which he believed was an idea of the celebrated Dr Johnson The cuttings presented no difficulty

The Chairman asked if there would be no difficulty in cutting it short, and on this hint the witness retired

The counsel for the bill then opened at great length on the subject of tunneling, when he was interrupted by

The Chairman, who asked if when the tunneling had been discussed the boring would terminate?

A Christian Colony.

BY L MARIA CHILD

The highest gifts my soul has received, during its world pilgrimage have often been bestowed by those who were poor both in money and intellectual cultivation Among these donors, I particularly remember a hard working uneducated mechanic from Indiana or Illinois He told me that he was one of thirty or forty New Englanders, who twelve years before had gone out to settle in the western wilderness — They were neighbors, and had been drawn to unite together in emigration from a general unity of opinion on various subjects For some years previous, they had been in the habit of meeting occasionally at each other s houses, to talk over their interest God and man in all simplicity of heart Their library was the Gospel, their priesthood the inward Light There was then no anti slavery society cut thus taught and reverently willing to learn they had no need of such agency to discover that it was wicked to enslave The efforts of peace societies had reached this secluded band only in broken echoes, and non resistance scarcely had no existence But with true volume of the Prince of Peace, and hearts open to its influence, what need had they of preambles and resolutions?

Rich in spiritual culture, this little band started for the far West Their inward lives were blooming gardens they were industrious and frugal, and all things prospered under their hands But soon wolves came near they fell in the shape of reckless unprincipled adventurers believers in force and coming who acted according to their creed The colony of practical Christians spoke of their depredations in terms of gentlest remonstrance, and repaid them with unvary ng kindness They went farther—they openly announced,— "You may do as what evil you choose, we will return nothing but good Lawyers came into the neighbourhood and offered their services to settle disputes They answered, "We have no need of you As neighbors we receive you in the most friendly spirit, but for us your occupation has ceased to exist — "What will ye do if rascals burn your barns and steal your harvests? "We will return good for evil We believe this is the highest truth and therefore the best expediency

When the rascals heard this, they considered it a marvelous good joke, and said and did many provoking things, which to them seemed witty Bars were taken down in the night and cows let into the cornfields The christians repaired the damages as well as they could, put the cows in the barn, and at twilight drove them gently home, saying, "Neighbor your cows have been in my field I have fed them well during the day, but I would not keep them all night, lest the children should suffer for their milk

If this was fun, they who planned the jokes found no heart to laugh at it By degrees a visible change came over these troublesome neighbors They ceased to cut off horses tails, and break the legs of poultry Rude boys would say to a younger brother, "Don t throw that stone, Bill' When I killed the chicken last week, didn t they send it to mother because they thought chicken broth would be good for poor Mary? I should think you would be ashamed to throw stones at *their* chickens Thus was evil overcome with good, till not one was found to do them wilful injury

Years passed on and saw them thriving in worldly substance beyond their neighbors, yet beloved by all From them the lawyer and the constable obtained no fees The Sheriff stammered and apologized, when he took their hard earned goods in payment for the war tax They meekly replied, "Tis a bad trade, friend if it be not so' But while they refused to pay such fees and taxes, they were liberal to a proverb in their contributions for all useful and benevolent purposes

At the end of ten years, the public lands which they had chosen for their farms, were advertised for sale by auction According to the custom those who had settled and cultivated the soil, were considered to have the right to bid it in at the Government price, which at that time was $1,25 per acre. But the fever of land speculation then chanced to run unusually high Adventurers from all parts of the country were flocking to the auction, capitalists in Baltimore, Philadelphia, New York and Boston, were sending agents to buy up western lands. No one supposed that custom would be regarded The first day s sale showed that speculation ran to the verge of insanity Land was eagerly bought up at seventeen twenty five, and thirty dollars per acre The Christian colony had small hope of retaining their farms — As first settlers, they had chosen the best land, and persevering industry had brought it into the highest cultivation Its market value was much greater than the acres already sold at exorbitant prices In view of these facts they had prepared their minds for another remove into the wilderness, perhaps again to be ejected by a similar process. But the morning their lot was offered for sale, they observed with grateful surprise that their neighbors were busy among the crowd, begging and expostulating "Don t bid on *these* lands These men have been working hard on them for ten years During all that time they never did harm to man or brute — They are always ready to give food for evil — They are a blessing to any neighborhood It would be a sin and a shame to bid on *their* lands Let them go at the Government price

The sale came on the cultivators of the soil offered $1,25 intending to bid higher if necessary But among all that crowd of selfish, reckless speculators, *not one bid over them* Without an opposing voice the farmers returned to them' I do not know a more remarkable instance of evil overcome by good The wisest political economy has folded up in the maxims of Christ

With delighted reverence I listened to the unlettered backwoodsman, as he explained his philosophy of universal love

'What would you do, said I, if an idle thriving vagabond came among you resolved to stay but determined not to work?

We would give him food when hungry shelter him when cold, and always treat him as a brother

Would not this process attract such characters How would you avoid being overrun with them

'Such characters would either reform or not remain with us We should not speak an angry word or refuse to minister to their necessities, but we should invariably regard them with the deepest sadness as we would a guilty but beloved son This is harder for the human soul to bear than whips or prisons They could not stand it I am sure they could not It would either melt them or drive them away In nine cases out of ten, I believe it would melt them

I felt rebuked for my want of faith and consequent shallowness of insight That hard handed laborer brought greater riches to my soul than an Eastern merchant laden with pearls Again, I repeat, money is not wealth

Letters from N York

Death of a Child.

No one feels the death of a child like a mother feels it Even the father cannot realize it thus There is a vacancy in his home and a heaviness in his heart, there is a claim of affection that at set times comes round with unbroken link there are memories tender and heart sick sense of loss, a weeping over crushed hopes and a pain of wounded affection But the mother feels that one has been taken away who was still closer to her heart Her child has been the object of constant solicitation Every gradation of nature was developed before her eyes She had detected every new gleam of intelligence She heard the first utterance of every new word — She had been the refuge of his fears the supply of his wants And every task of affection has woven a new link, and made dear to her its object And when he dies a portion of her own life, as it were, dies How can she give him up with all these memories, these associations?— The tiny hands that have so often taken hers in trust and love, how can she fold them on her breast, and give them up to the cold clasp of death The feet whose wanderings she has watched so narrowly, how can she see them straightened to go down into the dark valley The head that she has pressed to her lips and her bosom, that she has watched in burning sickness and in peaceful slumber, a hair of which she could not see harmed, O! how can she consign it to the chamber of the grave The Firm that not for one night has been beyond her vision or her knowledge how can she put it away for the long night of the sepulchre, to see it here no more? Man has cares and toils that draw away his thoughts and employ them she sits in loneliness and all these suggestions crowd upon her How can she bear all this?— She would not were it not that her faith is as her affection, and if the one is more deep and tender than in man the other is more simple, sublime and takes confidently hold of the hand of God [*Rev E H Chapin*

Spirit of Love.

Beyond all question it is a valuable consideration of nature, that there is efficacy, divine and unspeakable efficacy in love The exhibition of kindness has the power to bring even the irrational animals into subjection Show kindness to a lion and you can lead him by the mane you can thrust your hand into his mouth you can melt the untamed ferocity of his heart into affection stronger than death In all of God s wise and unbounded creation, there is nothing and sentient being from the least to the largest not one not even the outcast and degraded serpent, that is insensible to acts of kindness If even such as our blessed Saviour manifested, could be introduced into the world and exert its appropriate dominion it would restore a state of things far more cheering, far brighter than the fabulous age of gold, it would annihilate every sting it would pluck every poisonous tooth, it would hush every discordant voice Even the inanimate creation is not insensible to its divine influence The bud and flower and fruit put forth most abundantly and beautifully where the hand of kindness is extended for their culture And if this blessed influence should extend it self over the earth, a moral garden of Eden would exist in every land instead of the thorn and briar, would spring up a spring-tree and myrtle the desert would blossom and the solitary place be made glad —Upham

Energy of Character.

It is so true that we are individually the architects of our own character, that the saying has passed into a proverb Young men think not enough of this truth What energy and perseverance might and ought to do for them, they trust to good fortune or the aid of others to accomplish or else the work is left undone How few, left to themselves know how to begin life, or having entered upon a career of business, halt and give back before they have fairly made trial of their powers' Energy is so essential in the early formation of character, that without it in nine cases out of ten, life becomes either a pest or a blank, in society

Value then, O youth just starting in life value that force, that native energy of character which will shape and control your future destiny We need not point to examples, to show the influence of this principle Our public stations are filled with such men The learned professions furnish multiplied instances, and in the industrial and mercantile pursuits of life, we shall find energy the capital stock in trade and the only sure guaranty of success

N H Courier

A Warning to Apprentices.

At the June term of the District Court holden at Portland, several boys from twelve to fifteen years of age were convicted of larceny and sentenced to the County Jail Among them was a boy who ran away from this office about one year ago, who is sentenced to six months imprisonment He was an active and intelligent lad, but he would have *his own way*, which in one short year has landed him in the County Jail' Let other boys take warning from his example, and not take the first false step

[Bulle

BY TODAY'S MAIL.

Serious Accident on the Worcester Rail-Road.

The Boston Mail of Friday states that on Thursday afternoon, an accident occurred on the Worcester Railroad at the curve between the Depot and Washington street bridge which came very near being fatal to engineers and passengers

The Worcester road has two tracks, but the cars going out start on the left hand track and at the curve pass to the right hand track A freight train going out, at fair speed accidentally met the Springfield passenger train, coming in precisely at the point of crossing The trains came together with great force, driving both engines back into the tenders, smashing the front part of one passenger car and doing much damage to two of the freight cars

Astonishing to say, the Engineers and firemen of both trains escaped without injury, and only one person was at all injured—a small boy who was somewhat bruised, and scalded with the steam and water

Neither of the trains were thrown off the track —but the loading cars were rather forced by driven into each other It is thought the engines are not entirely ruined

There is probably no blame attached to the conductors, as such a collision was not to be anticipated—there being a double track on all other parts of the road

Fire in Providence.

A fire broke out on Wednesday in the stable occupied by E R Ingraham in the rear of the Washington Hotel which communicated to several other buildings The Hotel was much injured the loss on it being about $800 Total loss, $20 000 Eleven thousand bushels of grain were injured by water

☞ The trial of McNulty at Washington, for embezzlement has been again postponed for a singular cause Mr Hall his counsel has been chosen District Attorney and is therefore unwilling to be sworn upon the oath required by the force of circumstance He however offers to consent to the prosecution as he is in possession of his client s secrets and the new District Attorney will not consent to try the one case unless he is prepared fully for it

Trouble in New California

The U S frigate Savannah is reported to have been at Monterey with a view to settle a soon for St Francisco settlers fully which circumstance occurred the whale ships and the American beef ship water log

☞ A party of Indians, about 70 in number a portion of the remnant of the ancient Indian tribes, encamped on North Fields, about an and a half from Salem

A CARD.

THE Ladies Temperance Society would tender their grateful thanks to the Ladies and Gentlemen of Bangor for their liberality in furnishing refreshments and decorations for their late Festival — Also to Engine Company No 1 for the use of their beautiful Hall, and would assure all those who have in any way contributed the means whereby they have been enabled to raise a fund for the relief of the suffering around them—that they will endeavor judiciously to dispose of it and trust they shall be enabled to send joy and gladness to many forlorn and wretched abodes
